

# ATTENTION STUDENTS!

## LOADING:

Do not over load or machines may “time out” and lock clothes in for an extended period of time

Leave 5 inches at the top of machine

Pile clothes loosely and make sure nothing is hanging from the door

## DETERGENT:

Too much detergent may cause over-sudsing and washer malfunction. Machines will be out of order until a technician can reprogram or repair the machines. Please help to keep our machines in working order.

For best results, use high-efficiency detergent and always follow the manufacturer’s directions on the detergent bottle label

Look for this symbol on your detergent container.

For non-HE detergent use only  $\frac{1}{4}$  of the recommended amount
